About Better Process Control School

FDA regulations 21 CFR 108, 113, and 114 require that each processor of low-acid or acidified foods operate with a certified supervisor on hand at all times during processing. These regulations are designed to prevent public health problems in low-acid and acidified packaged foods.

To prepare industry practitioners and help companies meet federal regulations, the Consumer Brands Association Foundation and its partner institutions offer the Better Process Control School (BPCS).

In addition to meeting FDA regulations, the BPCS course also meets USDA FSIS regulations 9 CFR 431 for thermally processed meat and poultry products.

The BPCS subject areas include thermal processing system operations, microbiological food safety, equipment operations, acidification, and container closure evaluation for low acid and acidified canned foods.

Who should attend?

The BPCS program is an important and valuable educational opportunity for operators, mid-level managers, and employees of food processing plants that utilize thermal processing.

The course is an excellent platform to improve thermal processing knowledge for food safety and quality assurance personnel, individuals who work with rigid and flexible packaged food products, academia, auditors, and government inspectors.

Training Options

- **Option 1:** Attend an in-person training at one of our partner institutions. (See Below)
- **Option 2:** Participate in virtual training with CBA's asynchronous course or with one of our partner institutions virtual courses. (See Below)

At the completion of coursework and passing of the required examinations, participants are awarded a certificate of completion.

For any inquiries, please contact us at foundation@consumerbrandsassociation.org

Course Material

Canned Foods: Principles of Thermal Process Control, Acidification and Container Closure Evaluation is the FDA approved text for the instruction of Better Process Control School. The book may be purchased online. The text is also available in Spanish. As of 2021, the book is also available via Amazon Kindle.

Course Content

Canned Foods: Principles of Thermal Process Control, Acidification, and Container Closure Evaluation, 9th Edition is organized into 15 chapters.

- 1. Introduction**
- 2. Microbiology of Thermally Processed Foods**
- 3. Sanitation for Retorts and Atmospheric Cookers**
- 4. Cleaning for Continuous Systems**
- 5. Double Seamed Metal and Plastic Containers**
- 6. Closures for Glass and Twist-Off Plastic Containers**
- 7. Flexible and Semirigid Containers**
- 8. Introduction to Thermal Processing**
- 9. Retort Equipment and Operation**
- 10. Batch Saturated Steam Retorts: Still and Agitating**
- 11. Continuous Rotary Retorts**
- 12. Retorts with Overpressure: Still and Agitating**
- 13. Hydrostatic Retorts**
- 14. Aseptic Processing and Packaging Systems**
- 15. Mild Thermal Processes**

	Requirements		
Chapters	Retort Certificate	Aseptic Certificate	Acidified Certificate
1. Introduction	Required	Required	Required
2. Microbiology of Thermally Processed Foods	Required	Required	Required
3. Sanitation for Retorts and Atmospheric Cookers	Required	-	At least one of these is required
4. Sanitation for Continuous Systems	-	Required	At least one of these is required
5. Closures for Double Seamed Metal and Plastic Containers	At least one of these is required	At least one of these is required	At least one of these is required
6. Closures for Glass and Twist-Off Plastic Containers			
7. Flexible and Semirigid Containers			
8. Introduction to Thermal Processing	Required	Required	Required
9. Retort Equipment and Operation	Required	-	-
10. Batch Saturated Steam Retorts: Still and Agitating	At least one of these is required	-	-
11. Continuous Rotary Retorts			
12. Still and Agitating Retorts That Process with Overpressure			
13. Hydrostatic Retorts			
14. Aseptic Processing and Packaging Systems	-	Required	-
15. Mild Thermal Processes	-	-	Required
